**Q. Is there anything that would stop you coming to work?**

**Please update your contact details:**

**Name:**

**Address:**

**Email:**

**Phone:**

**Another contact person for you (name and phone number):**

- **Those over 70:** Older people often have underlying health issues, including respiratory issues that make them more vulnerable to COVID-19.
- **People with medical conditions:** Underlying medical conditions can make you more vulnerable to COVID-19. In particular, people with respiratory conditions, such as COPD (Chronic Obstructive Pulmonary Disease), heart conditions, high blood pressure, kidney problems and diabetes.
- **People undergoing a treatment for cancer or blood conditions:** As treatments for cancer and blood conditions affect people's immune systems, this makes them more vulnerable to COVID-19.
- **Pregnant women:** Health experts do not yet know if pregnant women are impacted by COVID-19 in the same way as other people. However, pregnant women experience changes in their bodies that may increase their risk from some infections.
- **People without easy access to healthcare**

**If there are any changes to the information provided or you are unwell, please contact your Supervisor.**
